## 100% COLD PRESSED ORGANIC JUICES

• NO SUGAR AND WATER ADDED, PRESERVATIVE FREE •

Anima LLC. started in 2001 as a pioneering company operating in several diverse business areas. One of Anima's primary activities is concentrating in the agricultural sector where, together with their subsidiary BIOPLANT, collaborate with numerous co-operators.

BIOPLANT is devoted to production and distribution of certified planting materials of goji berries. In order to meet the European organic production standards, the goji berries must be produced in strictly controlled conditions and to meet the quality requirements.

Since recently, BIOPLANT have started with the production of organic cold pressed fruit juices with an unmatched taste thanks to the unique mixes of goji with apple, raspberry and sour cherry. The production is in its own factory.

We produced juices with four different flavors:

- Goji and Apple 100% cold pressed organic juice
- Goji, Sour Cherry and Apple 100% cold pressed organic juice
- Goji, Raspberry and Apple 100% cold pressed organic juice

# GOJI – THE HOLY GRAIL OF HEALTHY DIET

There is not a single other plant with so much antioxidants, amino acids, essential fatty acids, minerals, vitamins and other useful ingredients.

## That's why goji is a superior fruit!

Goji is a plant with delicious red berry fruits. These small but powerful berries contain the secret of longevity of the people from Tibet, the location of its origin.

Due to the wealth of nutrients, this superior fruit has really broad range of action. These are some of the health benefits of goji berry: strengthens immune system, slows down aging process, provides strength and energy, prevents leukaemia and other cancers, prevents heart and blood vessels diseases, antibacterial and anti-inflammatory properties, improves fertility in women, improves sperm quality, improves sight, improves blood circulation in the organism, prevents the occurrence of diabetes, improves skin flexibility and humidity, it is used as an aphrodisiac.

According to the US ORAC scale (Oxygen Radical Absorbance Capacity scale), **goji is a superior first!**

We should clarify that the higher ranking at the ORAC scale means higher ability of the food to destroy free radicals which have adverse effect on the health, cause chronic diseases and speed-up the aging process.

# COLD PRESSED ORGANIC GOJI & APPLE JUICE

Promoted as **superfruits** in the recent years, goji berries are known to help fight diabetes and cancer. They also are known for their powerful antioxidants and anti-aging effects. Combination of goji and apple, embodied into a juice with unmatched taste, is a true treasury of ingredients that have positive influence on our organism.

BIOPLANT goji and apple juice is produced only from certified organic goji and apples produced by our co-operators in Macedonia. We carefully select the healthy fruits, we wash them, grind them and press them, and we pack the juice drops in a glass package since it keeps the taste unchanged. In order to prevent the sunlight influence on the quality and taste of the juice, we use modern technology to cover the whole bottle with a special foil.

Our final product is cloudy organic goji and apple juice. It is a mix which has not been produced in Europe so far, and we are particularly proud that we do not import goji, but we only use Macedonian organic goji for our juices.

**AVAILABLE PACKAGINGS:** 60, 250 and 750 ml glass bottles, and bag-in-box

**SHELF LIFE:** 24 months

**STORAGE:** Room temperature

We do not add water, sugar or preservative in the juice. Juice expiration date is one year and does not spoil because it is produced by a short pasteurization process, which creates "natural vacuum" when closing the bottles which prevents air to reach the juice.

# COLD PRESSED ORGANIC GOJI, SOUR CHERRY & APPLE JUICE

Sour cherries contain many antioxidants and have many ingredients that are thought to reduce inflammation and high blood pressure, help digestion. It also contains melatonin which helps to regulate sleep patterns. Sour cherry juice is a popular drink with links to several health benefits, including boosting the immune system, improving memory and help people recover after a workout.

In order to get tasty juice, we mix the goji and sour cherry with the apple juice in ration that provide dominance of the sour cherry taste and smell, while goji provides the specific flavour. We carefully select the healthy fruits, we wash them, grind them and press them, and we pack the juice drops in a glass package since it keeps the taste unchanged. In order to prevent the sunlight influence on the quality and taste of the juice, we use modern technology to cover the whole bottle with a special foil.

Our final product is cloudy organic goji, sour cherry and apple juice with unmatched taste! It is a true little treasury of ingredients that have positive influence on our organism. It is a combination which has not been marketed in Europe so far, and it is 100% organic product.
